

# Recombinant Full Length Panax Ginseng Nad(P)H-Quinone Oxidoreductase Subunit 3, Chloroplastic(Ndhc) Protein, His-Tagged

**Cat. No.** RFL28563PF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                        |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length Panax ginseng NAD(P)H-quinone oxidoreductase subunit 3, chloroplastic(ndhC) Protein (Q68S01) (1-120aa), fused to N-terminal His tag, was expressed in E. coli. |
| <b>Species</b>          | Panax ginseng (Korean ginseng)                                                                                                                                                         |
| <b>Source</b>           | E.coli                                                                                                                                                                                 |
| <b>ProteinLength</b>    | Full Length (1-120)                                                                                                                                                                    |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                                     |
| <b>AA Sequence</b>      | MFLLYEYDIFWAFLLISSLIPILAFFISGVLAPISKGPEKLSSYESGIEPMGNAWLQFRI R<br>YYMFALVFVVFVDVETVFLYPWAMSFVGLGVSVFIEALIFVLILIVGLVYAWRKGALEW<br>S                                                     |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                            |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                                    |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid repeated freeze-thaw cycles.                                                                         |

**Storage Buffer** Tris/PBS-based buffer, 6% Trehalose, pH 8.0

**Reconstitution** We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

## GENE INFORMATION

**Gene Name** ndhC

**Synonyms** ndhC; PSC0521; NAD(PH)-quinone oxidoreductase subunit 3, chloroplastic; NAD(PH) dehydrogenase subunit 3; NADH-plastoquinone oxidoreductase subunit 3

**UniProt ID** [Q68S01](#)
