

# Recombinant Full Length Bacillus Thuringiensis Subsp. Konkukian Holin-Like Protein Cida(Cida) Protein, His-Tagged

**Cat. No.** RFL18432BF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                  |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length Bacillus thuringiensis subsp. konkukian Holin-like protein CidA(cidA) Protein (Q6HFD1) (1-121aa), fused to N-terminal His tag, was expressed in E. coli. |
| <b>Species</b>          | Bacillus thuringiensis                                                                                                                                                           |
| <b>Source</b>           | E.coli                                                                                                                                                                           |
| <b>ProteinLength</b>    | Full Length (1-121)                                                                                                                                                              |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                               |
| <b>AA Sequence</b>      | MKWWKLSGQILLFCFAWTGEWIAKQAHLVPVPGSIIGIFLLLSLKFNLVKKEWIQDGA<br>D FLLKELILFFIPSAVAVIRYKDTLSQYGIDLILIMISTLCVTLVTGLLTELLKRGKSV Q                                                     |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                      |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                              |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid repeated freeze-thaw cycles.                                                                   |
| <b>Storage Buffer</b>   | Tris/PBS-based buffer, 6% Trehalose, pH 8.0                                                                                                                                      |

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

**GENE INFORMATION**

|            |                                            |
|------------|--------------------------------------------|
| Gene Name  | cidA                                       |
| Synonyms   | cidA; BT9727_3424; Holin-like protein CidA |
