

## Recombinant Full Length *Gloeobacter Violaceus* Upf0060 Membrane Protein Glr4174(Glr4174) Protein, His-Tagged

**Cat. No.** RFL21358GF    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                           |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length <i>Gloeobacter violaceus</i> UPF0060 membrane protein glr4174(glr4174) Protein (Q7NDQ8) (1-107aa), fused to N-terminal His tag, was expressed in <i>E. coli</i> . |
| <b>Species</b>          | <i>Gloeobacter violaceus</i>                                                                                                                                                              |
| <b>Source</b>           | <i>E. coli</i>                                                                                                                                                                            |
| <b>Protein Length</b>   | Full Length (1-107)                                                                                                                                                                       |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                                        |
| <b>AA Sequence</b>      | MALLLFGLAAAAEIGGCFAFWSVLRLGKNPLWLAPGLVSLVVFALLTRSEATYAGR<br>AYA AYGGVYIAASLVWLWLVEGTRPDRWDLAALLCLAGAAVILFADRSP                                                                            |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                               |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                                       |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for multiple use. Avoid repeated freeze-thaw cycles.                                                                           |
| <b>Storage Buffer</b>   | Tris/PBS-based buffer, 6% Trehalose, pH 8.0                                                                                                                                               |

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.
