

# Recombinant Full Length *Gloeobacter Violaceus* Nad(P)H-Quinone Oxidoreductase Subunit 3(Ndhc) Protein, His-Tagged

**Cat. No.** RFL13275GF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length <i>Gloeobacter violaceus</i> NAD(P)H-quinone oxidoreductase subunit 3(ndhC) Protein (Q7NML7) (1-120aa), fused to N-terminal His tag, was expressed in <i>E. coli</i> . |
| <b>Species</b>          | <i>Gloeobacter violaceus</i>                                                                                                                                                                   |
| <b>Source</b>           | <i>E. coli</i>                                                                                                                                                                                 |
| <b>Protein Length</b>   | Full Length (1-120)                                                                                                                                                                            |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                                             |
| <b>AA Sequence</b>      | MFVLSGYDALLIFLLLSALVPVLALTISYLIRPKGSGAFRTTTYESGVDPRGDSWIQFNI<br>RYYMFALVFVFDVETVFLYPWAVAFNQLGLLAFIEALIFIALVVALVYAWRKGAL<br>EWT                                                                 |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                                    |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                                            |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for multiple use. Avoid repeated freeze-thaw cycles.                                                                                |

|                       |                                             |
|-----------------------|---------------------------------------------|
| <b>Storage Buffer</b> | Tris/PBS-based buffer, 6% Trehalose, pH 8.0 |
|-----------------------|---------------------------------------------|

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

**GENE INFORMATION****Gene Name**

ndhC

**Synonyms**

ndhC; glr0748; NAD(PH)-quinone oxidoreductase subunit 3; NAD(PH) dehydrogenase subunit 3; NADH-plastoquinone oxidoreductase subunit 3; NDH-1 subunit 3; NDH-C

**UniProt ID**[Q7NML7](#)
