

# Recombinant Full Length Human Dna Damage-Regulated Autophagy Modulator Protein 2(Dram2) Protein, His-Tagged

**Cat. No.** RFL12402HF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                              |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length Human DNA damage-regulated autophagy modulator protein 2(DRAM2) Protein (Q6UX65) (1-266aa), fused to N-terminal His tag, was expressed in E. coli.                                                                                                                   |
| <b>Species</b>          | Human                                                                                                                                                                                                                                                                                        |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                                                                                       |
| <b>ProteinLength</b>    | Full Length (1-266)                                                                                                                                                                                                                                                                          |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                                                                                                                                           |
| <b>AA Sequence</b>      | MWWFQQGLSFLPSALVIWTSAAFIYSYITAVTLHHIDPALPYISDTGTVAPEKCLFGA<br>ML NIAAVLCIATYVRYKQVHALSPEENVIIKLNKAGLVGLSCLGLSIVANFQKTTLFA<br>A HVSGAVLTFGMGSLYMFVQTILSYQMOPKIHGKQVFWIRLLLVIWCGVSALSMLTC<br>SSVL HSGNFGTDLEQKLHWNPEDKGYVLHMITTAAEWSMSFSFFGFFLTYYIRDFQKI<br>SLRVEAN LHGLTLYDTAPCPINNERTRLLSRDI |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                                                                                                                                  |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                                                                                                                                          |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid                                                                                                                                                                                                            |

repeated freeze-thaw cycles.

**Storage Buffer** Tris/PBS-based buffer, 6% Trehalose, pH 8.0

**Reconstitution** We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

## GENE INFORMATION

**Gene Name** DRAM2

**Synonyms** DRAM2; TMEM77; PSEC0031; UNQ154/PRO180; DNA damage-regulated autophagy modulator protein 2; Transmembrane protein 77

**UniProt ID** [Q6UX65](#)
