

# Recombinant Full Length Rat V-Type Proton ATPase Subunit E 1(Atp6V0E1) Protein, His-Tagged

**Cat. No.** RFL36743RF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                          |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length Rat V-type proton ATPase subunit e 1(Atp6v0e1) Protein (Q794C0) (2-81aa), fused to N-terminal His tag, was expressed in E. coli. |
| <b>Species</b>          | Rat                                                                                                                                                      |
| <b>Source</b>           | E.coli                                                                                                                                                   |
| <b>ProteinLength</b>    | Full Length of Mature Protein (2-81)                                                                                                                     |
| <b>Form</b>             | Lyophilized powder                                                                                                                                       |
| <b>AA Sequence</b>      | AYHGLTVPLIVMSVFWGFGVLLVPWFIPKGPNGVITMLVTCSVCCYLFWLIAILAQL<br>N PLFGPQLKNETIWYLKYHWP                                                                      |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                              |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                      |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid repeated freeze-thaw cycles.                                           |
| <b>Storage Buffer</b>   | Tris/PBS-based buffer, 6% Trehalose, pH 8.0                                                                                                              |

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

**GENE INFORMATION****Gene Name**

Atp6v0e1

**Synonyms**

Atp6v0e1; Atp6v0e; Dsr1; V-type proton ATPase subunit e 1; V-ATPase subunit e 1; D-serine-regulated transcript 1 protein; DSR-1; V-ATPase 9.2 kDa membrane accessory protein; V-ATPase M9.2 subunit; Vacuolar proton pump subunit e 1
