

# Recombinant Full Length Mouse Vesicle-Trafficking Protein Sec22A(Sec22A) Protein, His-Tagged

**Cat. No.** RFL4695MF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                                                                              |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length Mouse Vesicle-trafficking protein SEC22a(Sec22a) Protein (Q8BH47) (1-307aa), fused to N-terminal His tag, was expressed in E. coli.                                                                                                                                                                                  |
| <b>Species</b>          | Mouse                                                                                                                                                                                                                                                                                                                                        |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                                                                                                                                       |
| <b>ProteinLength</b>    | Full Length (1-307)                                                                                                                                                                                                                                                                                                                          |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                                                                                                                                                                                           |
| <b>AA Sequence</b>      | MSMILSASVIRVRDGLPLSASTDYEQSTGMQECRKYFKMLSRKLAQFPDRCTLKTG<br>RYNI NFISSLGVSYMMLCSENYPNVLAFSFLDELQKEFITTNNMMKTNTAVRPYCFIE<br>FDNFIQ RTKQRYNNPRSLSTKINLSDMQMEIKLRPPYQIPMCELGSANGVTSAFSVD<br>CKGAGKISS AHQRLEPATLSGIVAFILSLLCGALNLIRGFHAIESLLQSDGEDLNYIIAF<br>FLGTAACLY QCYLLVYYTSWRNVKSFLTFGLICLCNMYLYELRNLWQLFFHVTVGAF<br>VTLQIWLRQAQG KAPDHDV |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                                                                                                                                                                                  |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                                                                                                                                                                                          |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid                                                                                                                                                                                                                                                            |

repeated freeze-thaw cycles.

**Storage Buffer**

Tris/PBS-based buffer, 6% Trehalose, pH 8.0

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

**GENE INFORMATION****Gene Name**

Sec22a

**Synonyms**

Sec22a; Sec22l2; Vesicle-trafficking protein SEC22a; SEC22 vesicle-trafficking protein homolog A; SEC22 vesicle-trafficking protein-like 2

**UniProt ID**
