

# Recombinant Full Length Bacteroides Thetaiotaomicron Potassium-Transporting ATPase C Chain(Kdpc) Protein, His-Tagged

**Cat. No.** RFL3763BF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length Bacteroides thetaiotaomicron Potassium-transporting ATPase C chain(kdpC) Protein (Q8A521) (1-189aa), fused to N-terminal His tag, was expressed in E. coli.                            |
| <b>Species</b>          | Bacteroides thetaiotaomicron                                                                                                                                                                                   |
| <b>Source</b>           | E.coli                                                                                                                                                                                                         |
| <b>ProteinLength</b>    | Full Length (1-189)                                                                                                                                                                                            |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                                                             |
| <b>AA Sequence</b>      | MKTLFKSLKITLVFCVFFSVFYILILWLFAQVAGPNKGNAEVATLDGKVVGAANVGQM<br>FT KDIYFWGRPSCAGDGYDASSSSGSNKGPTNPEYLAEEVEARIDTFLVHHPYLSRK<br>DVPAEM VTASASGLDPNITPQCAYVQVKRVAQARGLTENQVKEIVDQSVEKPLLIGIF<br>GTEKINVLK LNIALEENK |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                                                    |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                                                            |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid                                                                                                                              |

repeated freeze-thaw cycles.

**Storage Buffer**

Tris/PBS-based buffer, 6% Trehalose, pH 8.0

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

## GENE INFORMATION

**Gene Name**

kdpC

**Synonyms**

kdpC; BT\_2423; Potassium-transporting ATPase KdpC subunit; ATP phosphohydrolase [potassium-transporting] C chain; Potassium-binding and translocating subunit C; Potassium-translocating ATPase C chain

**UniProt ID**
