

# Recombinant Full Length Arabidopsis Thaliana Probable Cdp-Diacylglycerol--Inositol 3-Phosphatidyltransferase 2(Pis2) Protein, His-Tagged

**Cat. No.** RFL20887AF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                                                 |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length Arabidopsis thaliana Probable CDP-diacylglycerol--inositol 3-phosphatidyltransferase 2(PIS2) Protein (Q8GUK6) (1-225aa), fused to N-terminal His tag, was expressed in E. coli.                                         |
| <b>Species</b>          | Arabidopsis thaliana                                                                                                                                                                                                                            |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                                          |
| <b>ProteinLength</b>    | Full Length (1-225)                                                                                                                                                                                                                             |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                                                                                              |
| <b>AA Sequence</b>      | MAKQRPATLSVYLYIPNIVGYMRVLLNCIAFSVCFSNKTLSLLYFFSFCCDAVDGWC<br>AR KFNQVSTFGAVLDMVTDREVSTACLLVILSQIYRPSLVFLSLLALDIASHWLQMYST<br>FLSG KTSBKDVKDSTSWLFRLLYYGNRMFMGYCCVSCEVLYIILLIATNQTENLMNV<br>VVKSLMQ ISPLSLLLALSIFGWSIKQIINVIQMKTAADVCLYDIEKQHKKP |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                                                                                     |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                                                                                             |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid                                                                                                                                                               |

 45-1 Ramsey Road, Shirley, NY 11967, USA

repeated freeze-thaw cycles.

**Storage Buffer**

Tris/PBS-based buffer, 6% Trehalose, pH 8.0

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

## GENE INFORMATION

**Gene Name**

PIS2

**Synonyms**

PIS2; At4g38570; F20M13.130; Probable CDP-diacylglycerol--inositol 3-phosphatidyltransferase 2; Phosphatidylinositol synthase 2; AtPIS2; PI synthase 2; PtdIns synthase 2

**UniProt ID**

[Q8GUK6](#)
