

# Recombinant Full Length Zea Mays Aquaporin Pip1-3/Pip1-4(Pip1-3; Pip1-4) Protein, His-Tagged

**Cat. No.** RFL18507ZF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                                                         |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length Zea mays Aquaporin PIP1-3/PIP1-4(PIP1-3; PIP1-4) Protein (Q9AQU5) (1-292aa), fused to N-terminal His tag, was expressed in E. coli.                                                                                                                                                             |
| <b>Species</b>          | Zea Mays                                                                                                                                                                                                                                                                                                                |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                                                                                                                  |
| <b>ProteinLength</b>    | Full Length (1-292)                                                                                                                                                                                                                                                                                                     |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                                                                                                                                                                      |
| <b>AA Sequence</b>      | MEGKEEDVRLGANKFSERQPIGTAAQGAGAGDDDKDYKEPPPAPLFEPGELKSWS<br>FYRAGIAEFVATFLFLYITVLTVMGVSKSTSKCATVGIQGIAWSFGGMIFALVYCTAGI<br>SGGHINPAVTFGLFLARKLSLTRAIFYIIMQCLGAICGAGVVKGFFQQLYMGNGGGA<br>NVVAPGYTKGDGLGAEIVGTFILVYTVFSATDAKRNARDSHVPILAPLPIGFAVFLVHL<br>ATIPITGTGINPARSLGAIIYNRDHAWSDHWIFWVGPFIGAALAAIYHQVIIRAIPFKSR<br>S |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                                                                                                                                                             |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                                                                                                                                                                     |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid                                                                                                                                                                                                                                       |

repeated freeze-thaw cycles.

**Storage Buffer**

Tris/PBS-based buffer, 6% Trehalose, pH 8.0

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

## GENE INFORMATION

**Gene Name**

PIP1-3;

**Synonyms**

PIP1-3; PIP1-4; Aquaporin PIP1-3/PIP1-4; Plasma membrane intrinsic protein 1-3; Plasma membrane intrinsic protein 1-4; ZmPIP1-3; ZmPIP1-4; ZmPIP1;3;4

**UniProt ID**
