

# Recombinant Full Length Human E3 Ubiquitin-Protein Ligase March2(March2) Protein, His-Tagged

**Cat. No.** RFL9069HF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                                                                                                                                              |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length Human E3 ubiquitin-protein ligase MARCH2(MARCH2) Protein (Q9P0N8) (1-246aa), fused to N-terminal His tag, was expressed in E. coli.                                                                                                                                                                                                                                                  |
| <b>Species</b>          | Human                                                                                                                                                                                                                                                                                                                                                                                                        |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                                                                                                                                                                                                       |
| <b>ProteinLength</b>    | Full Length (1-246aa)                                                                                                                                                                                                                                                                                                                                                                                        |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                                                                                                                                                                                                                                                           |
| <b>AA Sequence</b>      | MTTGDCCHLPGLSLCDCSGSPAFSKVVEATGLGPPQYVAQVTSRDGRLLSTVIRALD<br>TPSDGPFRCRICHEGANGECLLSPCGCTGTLGAVHKSCLEKWLSSSNTSYCELCHTE<br>FAVEKRPRPLTEWLKDPGPRTEKRTLCCDMVCFLFITPLAAISGWLCRLGAQDHLRL<br>HSQLEAVGLIALTIALFTIYVLWTLVSFRYHCQLYSEWRKTNQKVRLKIREADSPEGP<br>QHSPLAAGLLKKVAEETPV Note: The complete sequence including tag sequence, t<br>arget protein sequence and linker sequence could be provided upon request. |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                                                                                                                                                                                                                                                  |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                                                                                                                                                                                                                                                          |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid                                                                                                                                                                                                                                                                                                                            |

 45-1 Ramsey Road, Shirley, NY 11967, USA

repeated freeze-thaw cycles.

**Storage Buffer**

Tris/PBS-based buffer, 6% Trehalose, pH 8.0

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

## GENE INFORMATION

**Gene Name**

MARCH2

**Synonyms**

MARCHF2; MARCH2; RNF172; HSPC240; E3 ubiquitin-protein ligase MARCHF2; Membrane-associated RING finger protein 2; Membrane-associated RING-CH protein II; MARCH-II; RING finger protein 172; RING-type E3 ubiquitin transferase MARCHF2

**UniProt ID**

[Q9P0N8](#)
