

# Recombinant Full Length Neisseria Meningitidis Serogroup A / Serotype 4A Na(+)-Translocating Nadh-Quinone Reductase Subunit D(Nqrd) Protein, His-Tagged

**Cat. No.** RFL24355NF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                             |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length Neisseria meningitidis serogroup A / serotype 4A Na(+)-translocating NADH-quinone reductase subunit D(nqrD) Protein (Q9JVVQ1) (1-208aa), fused to N-terminal His tag, was expressed in E. coli.     |
| <b>Species</b>          | Neisseria meningitidis serogroup A / serotype 4A                                                                                                                                                                            |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                      |
| <b>ProteinLength</b>    | Full Length (1-208)                                                                                                                                                                                                         |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                                                                          |
| <b>AA Sequence</b>      | MADMKRLKHLMFSPFIDNNPIALQVLGICSALAVTTKLQTAIVMGISVALVTGFSSFFIS<br>LVRNYIPNSIRIIVQMAIIASLVTLDQLLQAFAYELSKQLSVFVGLIITNCIVMGRAEA F<br>AMKEPPLESIDGIGNGAGYGMMLLVVATVRELIGSGKLLGYTVFQTVQDGGWYQT<br>NGL FLLAPSAFFIIGFLIWGLRTWKPEQAE |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                                                                 |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                                                                         |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid                                                                                                                                           |

repeated freeze-thaw cycles.

**Storage Buffer**

Tris/PBS-based buffer, 6% Trehalose, pH 8.0

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

## GENE INFORMATION

**Gene Name**

nqrD

**Synonyms**

nqrD; NMA0749; Na(+)-translocating NADH-quinone reductase subunit D; Na(+)-NQR subunit D; Na(+)-translocating NQR subunit D; NQR complex subunit D; NQR-1 subunit D

**UniProt ID**

[Q9JVVQ1](#)
