

# Recombinant Full Length Lactobacillus Acidophilus Atp Synthase Subunit B(Atpf) Protein, His-Tagged

**Cat. No.** RFL17183LF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                      |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length Lactobacillus acidophilus ATP synthase subunit b(atpF) Protein (Q9RGY5) (1-169aa), fused to N-terminal His tag, was expressed in E. coli.                    |
| <b>Species</b>          | Lactobacillus acidophilus                                                                                                                                                            |
| <b>Source</b>           | E.coli                                                                                                                                                                               |
| <b>ProteinLength</b>    | Full Length (1-169)                                                                                                                                                                  |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                                   |
| <b>AA Sequence</b>      | MTIQTFLFAASHHHIYLGNAIWYLLCFAILMLLIKHAWGPVSDMMEKRRQKIISDLDSAA<br>S DRKKAETLANEREAALKNSRQEATQILSDAKTNAQNTSKEIVASANEDAAAIRKKA<br>NEEA AKAKSDALDAARDQVADISVAIAEKVIAKNLSAEDQKDLVDQFIKGLDD |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                          |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                                  |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid repeated freeze-thaw cycles.                                                                       |
| <b>Storage Buffer</b>   | Tris/PBS-based buffer, 6% Trehalose, pH 8.0                                                                                                                                          |

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

**GENE INFORMATION**

|                   |                                                                                                                                        |
|-------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| <b>Gene Name</b>  | atpF                                                                                                                                   |
| <b>Synonyms</b>   | atpF; LBA0774; ATP synthase subunit b; ATP synthase F0 sector subunit b; ATPase subunit I; F-type ATPase subunit b; F-ATPase subunit b |
| <b>UniProt ID</b> | <a href="#">Q9RGY5</a>                                                                                                                 |
