

Recombinant Human CTNND1 Protein, N-His6ABP-tagged

Cat. No. CTNND1-12H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant protein fragment of Human CTNND1 with a N-terminal His6ABP tag (ABP=Albumin Binding Protein derived from Streptococcal Protein G) was expressed in E. coli.
Species	Human
Source	E.coli
Description	This gene encodes a member of the Armadillo protein family, which function in adhesion between cells and signal transduction. Multiple translation initiation codons and alternative splicing result in many different isoforms being translated. Not all of the full-length natures of the described transcript variants have been determined. Read-through transcription also exists between this gene and the neighboring upstream thioredoxin-related transmembrane protein 2 (TMX2) gene.
