

Recombinant Human LIN28B Protein (2-250), N-FLAG/Avi-tagged, Biotin-labeled

Cat. No. LIN28B-09H Lot. No. (See product label)

SPECIFICATION

Product Overview	Human LIN28B also known as Lin-28 Homolog B, with N-terminal FLAG-Avi-Tag and biotin labeled, GenBank Accession No. NM_001004317, a.a. 2-250 (end), expressed in a HEK293 cell expression system.
Species	Human
Source	HEK293
ProteinLength	2-250
Description	The protein encoded by this gene belongs to the lin-28 family, which is characterized by the presence of a cold-shock domain and a pair of CCHC zinc finger domains. This gene is highly expressed in testis, fetal liver, placenta, and in primary human tumors and cancer cell lines. It is negatively regulated by microRNAs that target sites in the 3' UTR, and overexpression of this gene in primary tumors is linked to the repression of let-7 family of microRNAs and derepression of let-7 targets, which facilitates cellular transformation.
Form	Aqueous buffer solution
Molecular Mass	30 kDa
Usage	Thaw on ice and gently mix prior to use. DO NOT VORTEX. Perform a quick spin before opening. Aliquot into small volumes and flash freeze for long term storage.
