

## Recombinant Lysinibacillus fusiformis Urethanase Protein (M1-I472), Flag/His-tagged

**Cat. No.** Urethanase-1555L    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                     |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Lysinibacillus fusiformis Flag-6His-TEV-G-Urethanase(M1-I472 end) protein with a Flag/His tag was expressed in E. coli                                  |
| <b>Species</b>          | Lysinibacillus fusiformis                                                                                                                                           |
| <b>Source</b>           | E.coli                                                                                                                                                              |
| <b>ProteinLength</b>    | M1-I472                                                                                                                                                             |
| <b>Form</b>             | Liquid                                                                                                                                                              |
| <b>Endotoxin</b>        | < 0.01 EU/μg of the protein                                                                                                                                         |
| <b>Purity</b>           | 90%                                                                                                                                                                 |
| <b>Stability</b>        | Samples are stable for up to twelve months from date of receipt at -20 to -80 centigrade                                                                            |
| <b>Storage</b>          | Store it under sterile conditions at -20 to -80 centigrade. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles. |
| <b>Storage Buffer</b>   | Supplied as sterile 50 mM Tris-HCl (pH7.5), 200 mM NaCl, 20% glycerol                                                                                               |
| <b>Shipping</b>         | It is shipped out with blue ice.                                                                                                                                    |
