

Recombinant Influenza A (H1N1) Antigen

Cat. No. IAV-03I **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Influenza A (H1N1) Antigen without tag was cultured in embryonated chicken eggs.
Species	Influenza A (H1N1)
Source	Embryonated chicken eggs
Description	Influenza is an infectious respiratory disease that, in humans, is caused by influenza A and influenza B viruses.
Form	Liquid
Notes	Virus preparation is inactivated by Gamma radiation. Effectiveness is determined when no detection of growth in two blind passages under the optimal culture conditions.
Storage	At -70 to -100 centigrade avoiding multiple freeze thaw cycles.
Storage Buffer	PBS
Warning	This material has been inactivated and should contain no infectious material. However, this material should still be handled with caution as potentially hazardous.
