Cat. No. ICA1-0012H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human ICA1 Protein without tag was expressed in HEK293.
Species	Human
Source	HEK293
Description	This gene encodes a protein with an arfaptin homology domain that is found both in the cytosol and as membrane-bound form on the Golgi complex and immature secretory granules. This protein is believed to be an autoantigen in insulin-dependent diabetes mellitus and primary Sjogren's syndrome. Several transcript variants encoding two different isoforms have been found for this gene.
Applications	ELISA, CLIA, CG
Notes	For research use only, not for use in diagnostic procedure.
