

## Recombinant EBV BZLF1 antigen

Cat. No. BZLF1-0023E    Lot. No. (See product label)

### SPECIFICATION

|                  |                                                                                                                            |
|------------------|----------------------------------------------------------------------------------------------------------------------------|
| Product Overview | Recombinant EBV BZLF1 antigen without tag was expressed in HEK293.                                                         |
| Species          | EBV                                                                                                                        |
| Source           | HEK293                                                                                                                     |
| Description      | Probably binds to silenced chromatin and recruits host chromatin-remodeling enzymes.                                       |
| Applications     | ELISA, CLIA                                                                                                                |
| Notes            | For research use only, not for use in diagnostic procedure.                                                                |
| Storage          | Short term (up to 7 days) store at 2–8 centigrade. Long term, store at - 20 centigrade. Avoid multiple freeze/thaw cycles. |
| Storage Buffer   | Supplied as a 0.2 µm filtered solution of PBS, pH7.4                                                                       |

### GENE INFORMATION

|                 |                                                                     |
|-----------------|---------------------------------------------------------------------|
| Gene Name       | BZLF1 protein Zta [ Human gammaherpesvirus 4 (Epstein-Barr virus) ] |
| Official Symbol | BZLF1                                                               |
| Synonyms        | BZLF1; protein Zta;                                                 |
