Cat. No. TNF-11HG Lot. No. (See product label)

SPECIFICATION

Product Overview	GMP recombinant human TNF-alpha protein (Val77-Leu233) with and without an N-terminal Met was expressed in E. coli, produced using non-animal reagents in an Animal-Free laboratory and manufactured and tested under cGMP guidelines.
Species	Human
Source	E.coli
ProteinLength	Val77-Leu233
Description	This gene encodes a multifunctional proinflammatory cytokine that belongs to the tumor necrosis factor (TNF) superfamily. This cytokine is mainly secreted by macrophages. It can bind to, and thus functions through its receptors TNFRSF1A/TNFR1 and TNFRSF1B/TNFR. This cytokine is involved in the regulation of a wide spectrum of biological processes including cell proliferation, differentiation, apoptosis, lipid metabolism, and coagulation. This cytokine has been implicated in a variety of diseases, including autoimmune diseases, insulin resistance, psoriasis, rheumatoid arthritis ankylosing spondylitis, tuberculosis, autosomal dominant polycystic kidney disease, and cancer. Mutations in this gene affect susceptibility to cerebral malaria, septic shock, and Alzheimer disease. Knockout studies in mice also suggested the neuroprotective function of this cytokine.

of the metabolic inhibitor actinomycin D. Matthews, The ED50 for this effect is 25-100 pg/mL.

The specific activity of recombinant human TNF-alpha GMP is $>4.3 \times 10^7$ IU/mg, which is calibrated against the human TNF-alpha WHO International Standard.
