Recombinant E. coli SAvPhire Protein, N-His/C-FLAG-tagged

Cat. No. SAvPhire-35E **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant E. coli SAvPhire Protein, fused to His-tag at N-terminusand and FLAG-tag at C-terminus, was expressed in E. coli.
Species	E.coli
Source	E.coli
Description	SAvPhire monomeric Streptavidin is a variant of biotin-bound streptavidin, which exists naturally as a tetramer. Many monomer Streptavidin proteins have rapid dissociation kinetics, which hinders their use in stable labeling applications. However, the engineering dissociation rate of Savphire monomeric streptavidin was comparable to that of tetramer streptavidin.
Form	Lyophilized from PBS (pH 7.4).
Storage	-20 centigrade
Shipping	wet ice

GENE INFORMATION

Gene Name	SAvPhire
