

Recombinant Human Alpha Hemoglobin Stabilizing Protein

Cat. No. AHSP-1392H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human AHSP protein was expressed in <i>E.coli</i> and purified by using conventional chromatography techniques. MW = 11.8 kDa (102aa).
Species	Human
Source	E.coli
Description	AHSP(Alpha-hemoglobin stabilizing protein), also known as ERAF(Erythroid associated factor), is an erythroid-specific protein that acts as a chaperone to prevent the aggregation of α -hemoglobin during normal erythroid cell development. It specifically protects free α -hemoglobin from precipitation in live cells and in solution. This protein is downregulated in transmissible spongiform encephalopathies (TSEs). It is predicted to modulate pathological states of alpha-hemoglobin excess such as beta-thalassemia.
