

Recombinant Human Calbindin 1, 28kDa

Cat. No. CALB1-1393H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human Calbindin1 was expressed in <i>E.coli</i> and purified by using conventional chromatography techniques. MW =30 kDa (261aa).
Species	Human
Source	E.coli
Description	Calbindin 1 is a calcium binding protein belonging to the troponin C superfamily. Calbindin is expressed in neural tissues. It plays an essential role in calcium regulation (including calcium transport and uptake, calcification of bone and teeth) and calcium related signalling in neurons and transiently in embryological development. This calbindin also has a role in protecting neurons from apoptotic cell death. Disregulation of this calbindin protein relates to epilepsy, amyotrophic lateral sclerosis, Huntington's disease.
