

# Recombinant Human VSIG2, His-tagged

**Cat. No.** VSIG2-3690H    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                      |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Human VSIG2 protein, fused to His-tag, was expressed in E.coli and purified by Ni-sepharose.                                                             |
| <b>Species</b>          | Human                                                                                                                                                                |
| <b>Source</b>           | E.coli                                                                                                                                                               |
| <b>ProteinLength</b>    | 24-243aa                                                                                                                                                             |
| <b>Storage</b>          | The protein is stored in PBS buffer at -20°C. Avoid repeated freezing and thawing cycles.                                                                            |
| <b>Storage Buffer</b>   | 1M PBS (58mM Na <sub>2</sub> HPO <sub>4</sub> , 17mM NaH <sub>2</sub> PO <sub>4</sub> , 68mM NaCl, pH8. ) added with 300mM Imidazole and 0.7% Sarcosyl, 15%glycerol. |

## GENE INFORMATION

|                        |                                                                                                                                                                                                                                          |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Gene Name</b>       | VSIG2 V-set and immunoglobulin domain containing 2 [ Homo sapiens ]                                                                                                                                                                      |
| <b>Official Symbol</b> | VSIG2                                                                                                                                                                                                                                    |
| <b>Synonyms</b>        | VSIG2; V-set and immunoglobulin domain containing 2; V-set and immunoglobulin domain-containing protein 2; CTH; CTXL; CT-like protein; cortical thymocyte-like protein; cortical thymocyte receptor (X. laevis CTX) like; 2210413P10Rik; |
