

Recombinant Human steroid receptor RNA activator 1, His-tagged

Cat. No. SRA1-357H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	SRA1, 90-236aa, Human, His tag, E.coli
Species	Human
Source	E.coli
ProteinLength	90-236 a.a.
Description	Steroid receptor RNA activator 1, also known as SRA1, exists as both a RNA transcript and as stably expressed proteins. Also this protein mediates transcriptional coactivation of steroid receptors ligand-dependently through the steroid-binding domain (AF-2). SRA1 enhances cellular proliferation and differentiation and promotes apoptosis in vivo. It may play a role in tumorigenesis. Recombinant human SRA1 protein, fused to His-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography techniques.
