

Recombinant Human beclin 1, autophagy related, His-tagged

Cat. No. BECN1-377H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	BECN1, 1-450aa, Human, His tag, E.coli
Species	Human
Source	E.coli
ProteinLength	1-450 a.a.
Description	BECN1, also as known as Beclin-1 and autophagy-related gene (Atg) 6, belongs to the beclin family. This protein plays a central role in autophagy. Beclin-1 and its binding partner class III phosphoinositide 3-kinase (PI3K), also named Vps34, are required for the initiation of the formation of the autophagosome in autophagy. Also it required for the abscission step of cytokinesis. BECN1 plays a role in antiviral host defense. Recombinant human BECN1 protein, fused to His-tag at N-terminus, was expressed in E.coli and purified by conventional column chromatography, after refolding of the isolated inclusion bodies in a renaturation buffer.
