SPECIFICATION

Product Overview	ENG, 26-586aa, Human, His tag, E.coli
Species	Human
Source	E.coli

Description	ENG is a homodimeric transmembrane protein which is a major glycoprotein of the vascular endothelium. This protein is a component of the transforming growth factor beta receptor complex and it binds to the beta1 and beta3 peptides with high affinity. Mutations in this gene cause hereditary hemorrhagic telangiectasia, also known as Osler-Rendu-Weber syndrome 1, an autosomal dominant multisystemic vascular dysplasia. This gene may also be involved in preeclampsia and several types of cancer. Recombinant human ENG prtoein, fused to His-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography techniques.
