

Recombinant Human matrix metalloproteinase 3 (stromelysin 1, progelatinase), His-tagged

Cat. No. MMP3-479H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	MMP3, 100-477aa Human, His tag, E.coli
Species	Human
Source	E.coli
ProteinLength	100-477 a.a.
Description	<p>Proteins of the matrix metalloproteinase (MMP) family are involved in the breakdown of extracellular matrix in normal physiological processes, such as embryonic development, reproduction, and tissue remodeling, as well as in disease processes, such as arthritis and metastasis. Most MMP"s are secreted as inactive proproteins which are activated when cleaved by extracellular proteinases. MMP3 is an enzyme which degrades fibronectin, laminin, collagens III, IV, IX, and X, and cartilage proteoglycans. The enzyme is thought to be involved in wound repair, progression of atherosclerosis, and tumor initiation. Recombinant human MMP3 protein, fused to His-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography techniques.</p>
