

Recombinant Human Y box binding protein 1, His-tagged

Cat. No. YBX1-636H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	YBX1, 1-324aa, Human, His tag, E.coli
Species	Human
Source	E.coli
ProteinLength	1-324 a.a.
Description	YBX1, also known as Y box binding protein 1, associates with the selenocysteine insertion sequence and functions in mammalian selenoprotein translation. This protein is a potential drug target in cancer therapy. It helps the replication of adenovirus type 5, a commonly used vector in gene therapy. Thus, YBX1 can cause an "oncolytic" effect in YBX1 positive cancer cells treated with adenoviruses. Recombinant human YBX1 protein, fused to His-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography.
Form	Liquid. Phosphate Buffered Saline (pH7.4) containing 20% glycerol
Molecular Mass	38.3 kDa (347aa) confirmed by MALDI-TOF(Molecular size on SDS-PAGE will appear higher)
