

Recombinant Human adenosine monophosphate deaminase 2, His-tagged

Cat. No. AMPD2-652H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	AMPD2, 236-879aa Human, His tag, E.coli
Species	Human
Source	E.coli
ProteinLength	236-879 a.a.
Description	AMPD2 is important in purine metabolism by converting AMP to IMP. This protein, which acts as a homotetramer, is one of three AMP deaminases found in mammals. Several transcript variants encoding different isoforms have been found for this gene. Recombinant human AMPD2 protein, fused to His-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography techniques.
Form	Liquid. In Phosphate buffered saline (pH7.4) containing 10% glycerol
