

Recombinant Human general transcription factor IIH, polypeptide 5, His-tagged

Cat. No. GTF2H5-659H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	GTF2H5, 1-71aa Human, His tag, E.coli
Species	Human
Source	E.coli
ProteinLength	1-71 a.a.
Description	GTF2H5 is a subunit of transcription/repair factor TFIIH, which functions in gene transcription and DNA repair. This protein stimulates ERCC3/XPB ATPase activity to trigger DNA opening during DNA repair, and is implicated in regulating cellular levels of TFIIH. Mutations in this gene result in trichothiodystrophy, complementation group A. Recombinant human GTF2H5 protein, fused to His-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography techniques.
