

Recombinant Human MAPK10, GST-tagged, Active

Cat. No. MAPK10-339H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant full-length human JNK3 was expressed by baculovirus in <i>Sf9 insect cell</i> using an N-terminal GST tag. MW = 71 kDa.
Species	Human
Source	Sf9 Cells
Description	JNK3 is a member of the c-Jun N-terminal kinases (JNKs) which are part of the mitogen-activated protein (MAP) kinase family, and regulate signal transduction in response to environmental stress. JNK3 phosphorylates various transcription factors such as ATF2, Elk-1 and members of the Jun family. Activation and nuclear localization of JNK3, a neuronal-specific isoform of JNK, has been associated with hypoxic and ischemic damage of CA1 neurons in the hippocampus. Knockout mice lacking JNK3 showed reduced apoptosis of hippocampal neurons and reduced seizure induced by kainic acid, a glutamate-receptor agonist.
Sequence	Full length.
Applications	Kinase Assay, Western Blot.
Storage And Stability	Store product at -70°C. For optimal storage, aliquot target into smaller quantities after centrifugation and store at recommended temperature. For most favorable performance, avoid repeated handling and multiple freeze/thaw cycles.
