

Recombinant Human ADD1, His-tagged

Cat. No. ADD1-3338H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Alpha-adducin (ADD1)
Species	Human
Source	E.Coli/Yeast
ProteinLength	737
Description	Adducins are a family of cytoskeleton proteins encoded by three genes (alpha, beta, gamma). Adducin is a heterodimeric protein that consists of related subunits, which are produced from distinct genes but share a similar structure. Alpha- and beta-adducin include a protease-resistant N-terminal region and a protease-sensitive, hydrophilic C-terminal region. Alpha- and gamma-adducins are ubiquitously expressed. In contrast, beta-adducin is expressed at high levels in brain and hematopoietic tissues. Adducin binds with high affinity to Ca(2+)/calmodulin and is a substrate for protein kinases A and C. Alternative splicing results in multiple variants encoding distinct isoforms; however, not all variants have been fully described.
Form	This item requires custom production and lead time is between 5-9 weeks. We can custom produce according to your specifications.
Purity	>90%
Notes	Small volumes of ADD1 recombinant protein may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly

centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container's cap. Certain products may require to ship with dry ice.

Storage Store at -20 degree C. For extended storage, store at -20 or -80 degree C.

Storage Buffer PBS pH 7.4, 50% glycerol

Warning This product is for research use only. Not for use in diagnostic or therapeutic procedures.

GENE INFORMATION

Gene Name [ADD1 adducin 1 \(alpha\) \[Homo sapiens \]](#)

Official Symbol ADD1

Synonyms ADD1; adducin 1 (alpha); alpha-adducin; erythrocyte adducin alpha subunit; ADDA; MGC3339; MGC44427;

Gene ID [118](#)

mRNA Refseq [NM_001119](#)

Protein Refseq [NP_001110](#)

MIM [102680](#)

UniProt ID [P35611](#)

Chromosome Location 4p16.3
