Recombinant Human APBB3, His-tagged

Cat. No. APBB3-3439H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Amyloid beta A4 precursor protein-binding family B member 3 (APBB3)
Species	Human
Source	E.Coli/Yeast
ProteinLength	493
Description	The protein encoded by this gene is a member of the APBB protein family. It is found in the cytoplasm and binds to the intracellular domain of the Alzheimer"s disease beta-amyloid precursor protein (APP) as well as to other APP-like proteins. It is thought that the protein encoded by this gene may modulate the internalization of APP. Multiple transcript variants encoding several different isoforms have been found for this gene.
Form	This item requires custom production and lead time is between 5-9 weeks. We can custom produce according to your specifications.
Purity	>90%
Notes	Small volumes of APBB3 recombinant protein may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice.
