

Recombinant Human TNNT2 Protein, N-His-tagged

Cat. No. TNNT2-010H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human TNNT2 protein with N-His tag was expressed in E. coli.
Species	Human
Source	E.coli
ProteinLength	298
Description	This gene encodes the cardiac isoform of troponin T. The encoded protein is the tropomyosin-binding subunit of the troponin complex, which is located on the thin filament of striated muscles and regulates muscle contraction in response to alterations in intracellular calcium ion concentration. Mutations in this gene have been associated with familial hypertrophic cardiomyopathy as well as with dilated cardiomyopathy.
