

Recombinant Human CCL19 Protein

Cat. No. CCL19-013H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human CCL19 protein
Species	Human
ProteinLength	98
Description	This antimicrobial gene is one of several CC cytokine genes clustered on the p-arm of chromosome 9. Cytokines are a family of secreted proteins involved in immunoregulatory and inflammatory processes. The CC cytokines are proteins characterized by two adjacent cysteines. The cytokine encoded by this gene may play a role in normal lymphocyte recirculation and homing. It also plays an important role in trafficking of T cells in thymus, and in T cell and B cell migration to secondary lymphoid organs. It specifically binds to chemokine receptor CCR7.
