

Recombinant Human PCNA Protein

Cat. No. PCNA-066H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human PCNA protein without tag was expressed in E. coli.
Species	Human
Source	E.coli
ProteinLength	261
Description	The protein encoded by this gene is found in the nucleus and is a cofactor of DNA polymerase delta. The encoded protein acts as a homotrimer and helps increase the processivity of leading strand synthesis during DNA replication. In response to DNA damage, this protein is ubiquitinated and is involved in the RAD6-dependent DNA repair pathway. Two transcript variants encoding the same protein have been found for this gene. Pseudogenes of this gene have been described on chromosome 4 and on the X chromosome.
