

Recombinant Human COMP Protein, His-tagged

Cat. No. COMP-185H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human COMP protein with His tag was expressed in HEK293.
Species	Human
Source	HEK293
ProteinLength	757
Description	The protein encoded by this gene is a noncollagenous extracellular matrix (ECM) protein. It consists of five identical glycoprotein subunits, each with EGF-like and calcium-binding (thrombospondin-like) domains. Oligomerization results from formation of a five-stranded coiled coil and disulfides. Binding to other ECM proteins such as collagen appears to depend on divalent cations. Contraction or expansion of a 5 aa aspartate repeat and other mutations can cause pseudocondroplasia (PSACH) and multiple epiphyseal dysplasia (MED).
Form	Lyophilized
