

Recombinant Human NECTIN2 Protein, His-tagged

Cat. No. NECTIN2-388H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human NECTIN2 protein with His tag was expressed in HEK293.
Species	Human
Source	HEK293
ProteinLength	538
Description	This gene encodes a single-pass type I membrane glycoprotein with two Ig-like C2-type domains and an Ig-like V-type domain. This protein is one of the plasma membrane components of adherens junctions. It also serves as an entry for certain mutant strains of herpes simplex virus and pseudorabies virus, and it is involved in cell to cell spreading of these viruses. Variations in this gene have been associated with differences in the severity of multiple sclerosis. Alternate transcriptional splice variants, encoding different isoforms, have been characterized.
Form	Lyophilized
Molecular Mass	37.4 kDa
