

Recombinant Human LIF Protein

Cat. No. LIF-519H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human LIF protein
Species	Human
ProteinLength	202
Description	The protein encoded by this gene is a pleiotropic cytokine with roles in several different systems. It is involved in the induction of hematopoietic differentiation in normal and myeloid leukemia cells, induction of neuronal cell differentiation, regulator of mesenchymal to epithelial conversion during kidney development, and may also have a role in immune tolerance at the maternal-fetal interface. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene.
