

Recombinant Human CSF1 Protein

Cat. No. CSF1-521H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human CSF1 protein
Species	Human
ProteinLength	554
Description	The protein encoded by this gene is a cytokine that controls the production, differentiation, and function of macrophages. The active form of the protein is found extracellularly as a disulfide-linked homodimer, and is thought to be produced by proteolytic cleavage of membrane-bound precursors. The encoded protein may be involved in development of the placenta. Alternate splicing results in multiple transcript variants.
