

Recombinant Rabbit CD47 Protein, Fc-tagged

Cat. No. CD47-643R **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Rabbit CD47 protein with Fc tag was expressed in HEK293.
Species	Rabbit
Source	HEK293
ProteinLength	321
Description	This gene encodes a membrane protein, which is involved in the increase in intracellular calcium concentration that occurs upon cell adhesion to extracellular matrix. The encoded protein is also a receptor for the C-terminal cell binding domain of thrombospondin, and it may play a role in membrane transport and signal transduction. This gene has broad tissue distribution, and is reduced in expression on Rh erythrocytes. Alternatively spliced transcript variants have been found for this gene.
