

Recombinant Human PDCD1 Protein

Cat. No. PDCD1-694H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human PDCD1 protein without tag was expressed in HEK293.
Species	Human
Source	HEK293
ProteinLength	288
Description	Programmed cell death protein 1 (PDCD1) is an immune-inhibitory receptor expressed in activated T cells; it is involved in the regulation of T-cell functions, including those of effector CD8+ T cells. In addition, this protein can also promote the differentiation of CD4+ T cells into T regulatory cells. PDCD1 is expressed in many types of tumors including melanomas, and has demonstrated to play a role in anti-tumor immunity. Moreover, this protein has been shown to be involved in safeguarding against autoimmunity, however, it can also contribute to the inhibition of effective anti-tumor and anti-microbial immunity.
