

Recombinant Human SLITRK6 Protein

Cat. No. SLITRK6-835H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human SLITRK6 protein without tag was expressed in HEK293.
Species	Human
Source	HEK293
ProteinLength	841
Description	This gene encodes a member of the SLITRK protein family. Members of this family are integral membrane proteins that are characterized by two N-terminal leucine-rich repeat (LRR) domains and a C-terminal region that shares homology with trk neurotrophin receptors. This protein functions as a regulator of neurite outgrowth required for normal hearing and vision. Mutations in this gene are a cause of myopia and deafness.
