

Recombinant Human ABCB10 Protein (A152-A738), Flag-10×His tagged

Cat. No. ABCB10-0241H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human ABCB10(A152-A738 end)-TEV-Flag-10His Protein was expressed in Mammalian cell.
Species	Human
Source	Mammalian Cells
ProteinLength	A152-A738
Description	Catalyzes the export of an unknown physiological substrate from the mitochondrial matrix to the cytosol in an ATP-dependent manner. May also transport the heme analog Zn (II) mesoporphyrin (ZnMP) in an ATP dependent manner but can't export the heme precursor 5-aminolevulinic acid (ALA) from mitochondria. Plays a role in the early step of the heme biosynthetic process during insertion of iron into protoporphyrin IX (PPIX). In turn participates in hemoglobin synthesis and also protects against oxidative stress. In addition may be involved in mitochondrial unfolded protein response (UPRmt) signaling pathway, although ABCB10 probably does not participate in peptide export from mitochondria.
Form	Liquid
Endotoxin	< 0.01 EU per µg of the protein
