

## Recombinant Human ATXN3L Protein (D2-K355), His/Flag tagged

**Cat. No.** ATXN3L-0374H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                     |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Human 8His-TEV-GG-ATXN3L(D2-K355 end)-Flag Protein was expressed in Insect cell.                                                                        |
| <b>Species</b>          | Human                                                                                                                                                               |
| <b>Source</b>           | Insect Cells                                                                                                                                                        |
| <b>ProteinLength</b>    | D2-K355                                                                                                                                                             |
| <b>Description</b>      | Deubiquitinating enzyme that cleaves both 'Lys-48'-linked and 'Lys-63'-linked poly-ubiquitin chains (in vitro).                                                     |
| <b>Form</b>             | Liquid                                                                                                                                                              |
| <b>Endotoxin</b>        | < 0.01 EU per µg of the protein                                                                                                                                     |
| <b>Purity</b>           | 90%                                                                                                                                                                 |
| <b>Stability</b>        | Samples are stable for up to twelve months from date of receipt at -20 to -80 centigrade.                                                                           |
| <b>Storage</b>          | Store it under sterile conditions at -20 to -80 centigrade. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles. |

 45-1 Ramsey Road, Shirley, NY 11967, USA

**Storage Buffer** Supplied as sterile 50mM Tris 8.0, 500mM NaCl, 5% glycerol, 1mM DTT.

**Shipping** It is shipped out with blue ice.

## GENE INFORMATION

**Gene Name** [ATXN3L ataxin 3-like \[ Homo sapiens \(human\) \]](#)

**Official Symbol** [ATXN3L](#)

**Synonyms** ataxin 3-like; ATX3L; MJDL; EC 3.4.19.12; Machado-Joseph disease protein 1-like; EC 3.4.22; putative ataxin-3-like protein

**Gene ID** [92552](#)

**mRNA Refseq** [NM\\_001135995](#)

**Protein Refseq** [NP\\_001129467](#)

**MIM** [300920](#)

**UniProt ID** [Q9H3M9](#)
