Cat. No. CASR-0502H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human HA(signal peptide)-Flag-TEV-CaSR(Y20-S1078 end)-10His Protein was expressed in Insect cell.
Species	Human
Source	Insect Cells
ProteinLength	Y20-S1078 end
Description	G-protein-coupled receptor that senses changes in the extracellular concentration of calcium ions and plays a key role in maintaining calcium homeostasis. Senses fluctuations in the circulating calcium concentration and modulates the production of parathyroid hormone (PTH) in parathyroid glands. The activity of this receptor is mediated by a G-protein that activates a phosphatidylinositol-calcium second messenger system. The G-protein-coupled receptor activity is activated by a co-agonist mechanism: aromatic amino acids, such as Trp or Phe, act concertedly with divalent cations, such as calcium or magnesium, to achieve full receptor activation.
Form	Liquid
Endotoxin	< 0.01 EU per µg of the protein
Purity	80%
