Cat. No. DMPK-0741H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human DMPK(M1-P629 end) Protein was expressed in Insect cell.
Species	Human
Source	Insect Cells
ProteinLength	M1-P629
Description	Non-receptor serine/threonine protein kinase which is necessary for the maintenance of skeletal muscle structure and function. May play a role in myocyte differentiation and survival by regulating the integrity of the nuclear envelope and the expression of muscle-specific genes. May also phosphorylate PPP1R12A and inhibit the myosin phosphatase activity to regulate myosin phosphorylation. Also critical to the modulation of cardiac contractility and to the maintenance of proper cardiac conduction activity probably through the regulation of cellular calcium homeostasis. Phosphorylates PLN, a regulator of calcium pumps and may regulate sarcoplasmic reticulum calcium uptake in myocytes. May also phosphorylate FXD1/PLM which is able to induce chloride currents. May also play a role in synaptic plasticity.
Form	Liquid
Endotoxin	< 0.01 EU per µg of the protein
