| <b>Description</b>      | Receptor tyrosine kinase which binds promiscuously transmembrane ephrin-B family ligands residing on adjacent cells, leading to contact-dependent bidirectional signaling into neighboring cells. The signaling pathway downstream of the receptor is referred to as forward signaling while the signaling pathway downstream of the ephrin ligand is referred to as reverse signaling. Together with its cognate ligand/functional ligand EFNB2 it is involved in the regulation of cell adhesion and migration, and plays a central role in heart morphogenesis, angiogenesis and blood vessel remodeling and permeability. EPHB4-mediated forward signaling controls cellular repulsion and segregation from EFNB2-expressing cells. |
| <b>Form</b>             | Liquid                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

|-----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                       | centigrade.                                                                                                                                                         |
| <b>Storage</b>        | Store it under sterile conditions at -20 to -80 centigrade. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles. |
| <b>Storage Buffer</b> | Supplied as sterile 50 mM Tris-HCl (pH7.5), 200 mM NaCl, 20% glycerol                                                                                               |
| <b>Shipping</b>       | It is shipped out with blue ice.                                                                                                                                    |

| <b>Gene Name</b>       | EPHB4 EPH receptor B4 [ Homo sapiens (human) ]                                                                                                                                                                                                                                                  |
| <b>Official Symbol</b> | EPHB4                                                                                                                                                                                                                                                                                           |
| <b>Synonyms</b>        | EPHB4; EPH receptor B4; EphB4, HTK; ephrin type-B receptor 4; Tyro11; ephrin receptor EphB4; soluble EPHB4 variant 1; soluble EPHB4 variant 2; soluble EPHB4 variant 3; hepatoma transmembrane kinase; tyrosine-protein kinase TYRO11; tyrosine-protein kinase receptor HTK; HTK; MYK1; TYRO11; |
| <b>Gene ID</b>         | 2050                                                                                                                                                                                                                                                                                            |
| <b>mRNA Refseq</b>     | NM_004444                                                                                                                                                                                                                                                                                       |
| <b>Protein Refseq</b>  | NP_004435                                                                                                                                                                                                                                                                                       |
