

## Recombinant Human LONRF2 Protein (S2-N754), His tagged

**Cat. No.** LONRF2-0120H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                     |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Human 6His-TEV-(GG)-LONRF2(S2-N754 end) Protein was expressed in E. coli.                                                                               |
| <b>Species</b>          | Human                                                                                                                                                               |
| <b>Source</b>           | E.coli                                                                                                                                                              |
| <b>ProteinLength</b>    | S2-N754                                                                                                                                                             |
| <b>Description</b>      | Predicted to enable metal ion binding activity.                                                                                                                     |
| <b>Form</b>             | Liquid                                                                                                                                                              |
| <b>Endotoxin</b>        | < 0.01 EU per µg of the protein                                                                                                                                     |
| <b>Purity</b>           | 90%                                                                                                                                                                 |
| <b>Stability</b>        | Samples are stable for up to twelve months from date of receipt at -20 to -80 centigrade.                                                                           |
| <b>Storage</b>          | Store it under sterile conditions at -20 to -80 centigrade. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles. |
| <b>Storage Buffer</b>   | 50mM Tris-HCl (pH 7.5), 200mM NaCl, 20% glycerol                                                                                                                    |
